Statement on Sustainable Palm Oil

11.03.2024

Dear customer,

As a conscientious family business, we attach great importance to the careful treatment of our environment. This idea includes the social responsibility for all employees who contribute to the development of our products.

As is well known, the cultivation of the oil palm is viewed quite critically from an ecological point of view. Non-compliance with legal requirements can lead to significant environmental damage. Since we also share the criticism of palm oil, we have already replaced more than half of all products with a palm-free alternative.

In addition to butter, vegetable oils and fats containing palm oil. They are also used in the production of our cakes, such as margarine (odour and taste neutrality, optimal baking properties). Where possible, however, we have replaced the margarine portion with butter.

Since the use of margarine and other palm oil-containing raw materials cannot be completely avoided, we have therefore decided to promote sustainable cultivation methods for the extraction of palm oil in order to limit environmental damage in the producing countries. Depending on the quantities of palm oil used, we support sustainable cultivation by purchasing certificates (so-called "Book and Claim procedure").

We assure you, that it is still our goal to produce palm-free products.

With kind regards

Pfalzgraf Konditorei GmbH
